Who's Tuned In? Age-Wise Viewing Trend

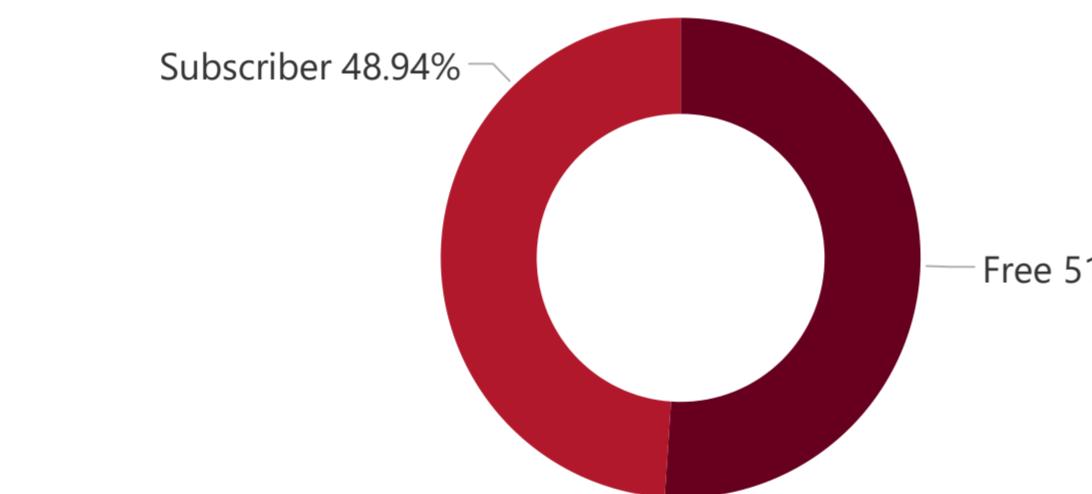

Total Users  Streaming Without Borders: Global Rea

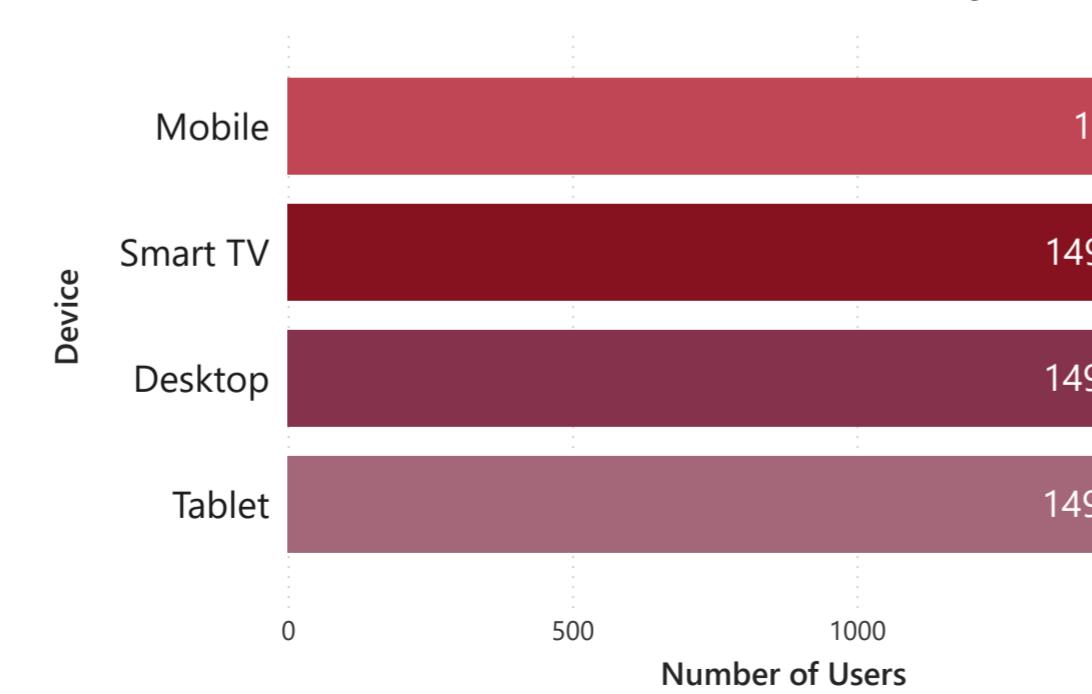

A bar chart titled "Number of Users" on the y-axis and "Country" on the x-axis. The y-axis has major ticks at 0, 200, 400, 600, and 800. The x-axis lists countries: Canada, USA, India, Italy, France, Spain, Australia, and New Zealand. Each country has a dark red vertical bar representing its user count. The bars for Canada, USA, India, and Italy reach the 800 mark. The bars for France, Spain, Australia, and New Zealand are cut off at the top of the chart area.

Country	Number of Users
Canada	800
USA	800
India	800
Italy	800
France	~750
Spain	~750
Australia	~750
New Zealand	~750

StreamFlix: Core Problem and Key Challenges

The core problem StreamFlix sought to solve was to understand detailed user engagement patterns on their current ad-supported streaming platform, in order to guide an effective transition to a subscription-based model.

The key challenges involved:

- Understanding diverse user behavior across multiple devices and content genres.
- Identifying barriers to converting free users into paying subscribers.
- Addressing demographic engagement disparities, especially for older age groups.
- Delivering actionable insights to optimize content offerings and marketing strategies.
- Enhancing user retention and satisfaction during the planned transition to a subscription model.

Insights

- Mobile is dominant, but usage is almost equally spread across all devices (Mobile, Smart TV, Desktop, Tablet). No device is drastically underused.
- Drama leads by a wide margin, followed by Comedy. Moderate interest in Horror, Romance, and Thrillers. Action and Documentaries rank lower.
- All movies have ratings close to 100% – indicating either a small number of ratings or very high satisfaction. Consistent excellence across all 10 titles.
- Fairly balanced split: 51% Free vs 49% Subscribers. High potential for converting free users.
- Canada, USA, and India lead slightly — very close race. Very even global distribution across 6 countries
- Highest user group: Senior (51+) – largest segment by far. Strong participation: 31–50 age range (Adult, Middle Age). Lowest engagement: Children (0–10) — significantly lower.

Recommendation

Double Down on What Works

Invest and Expand production/licensing of Drama and Comedy content. Promote these in-app and through email to show subscribers they're getting access to the best content.

Turn Interest into Action

Launch tailored campaigns for free users especially those on mobile and smart TVs. Offer a free trial or a starter plan at a low cost.

Talk to Your Core Audience

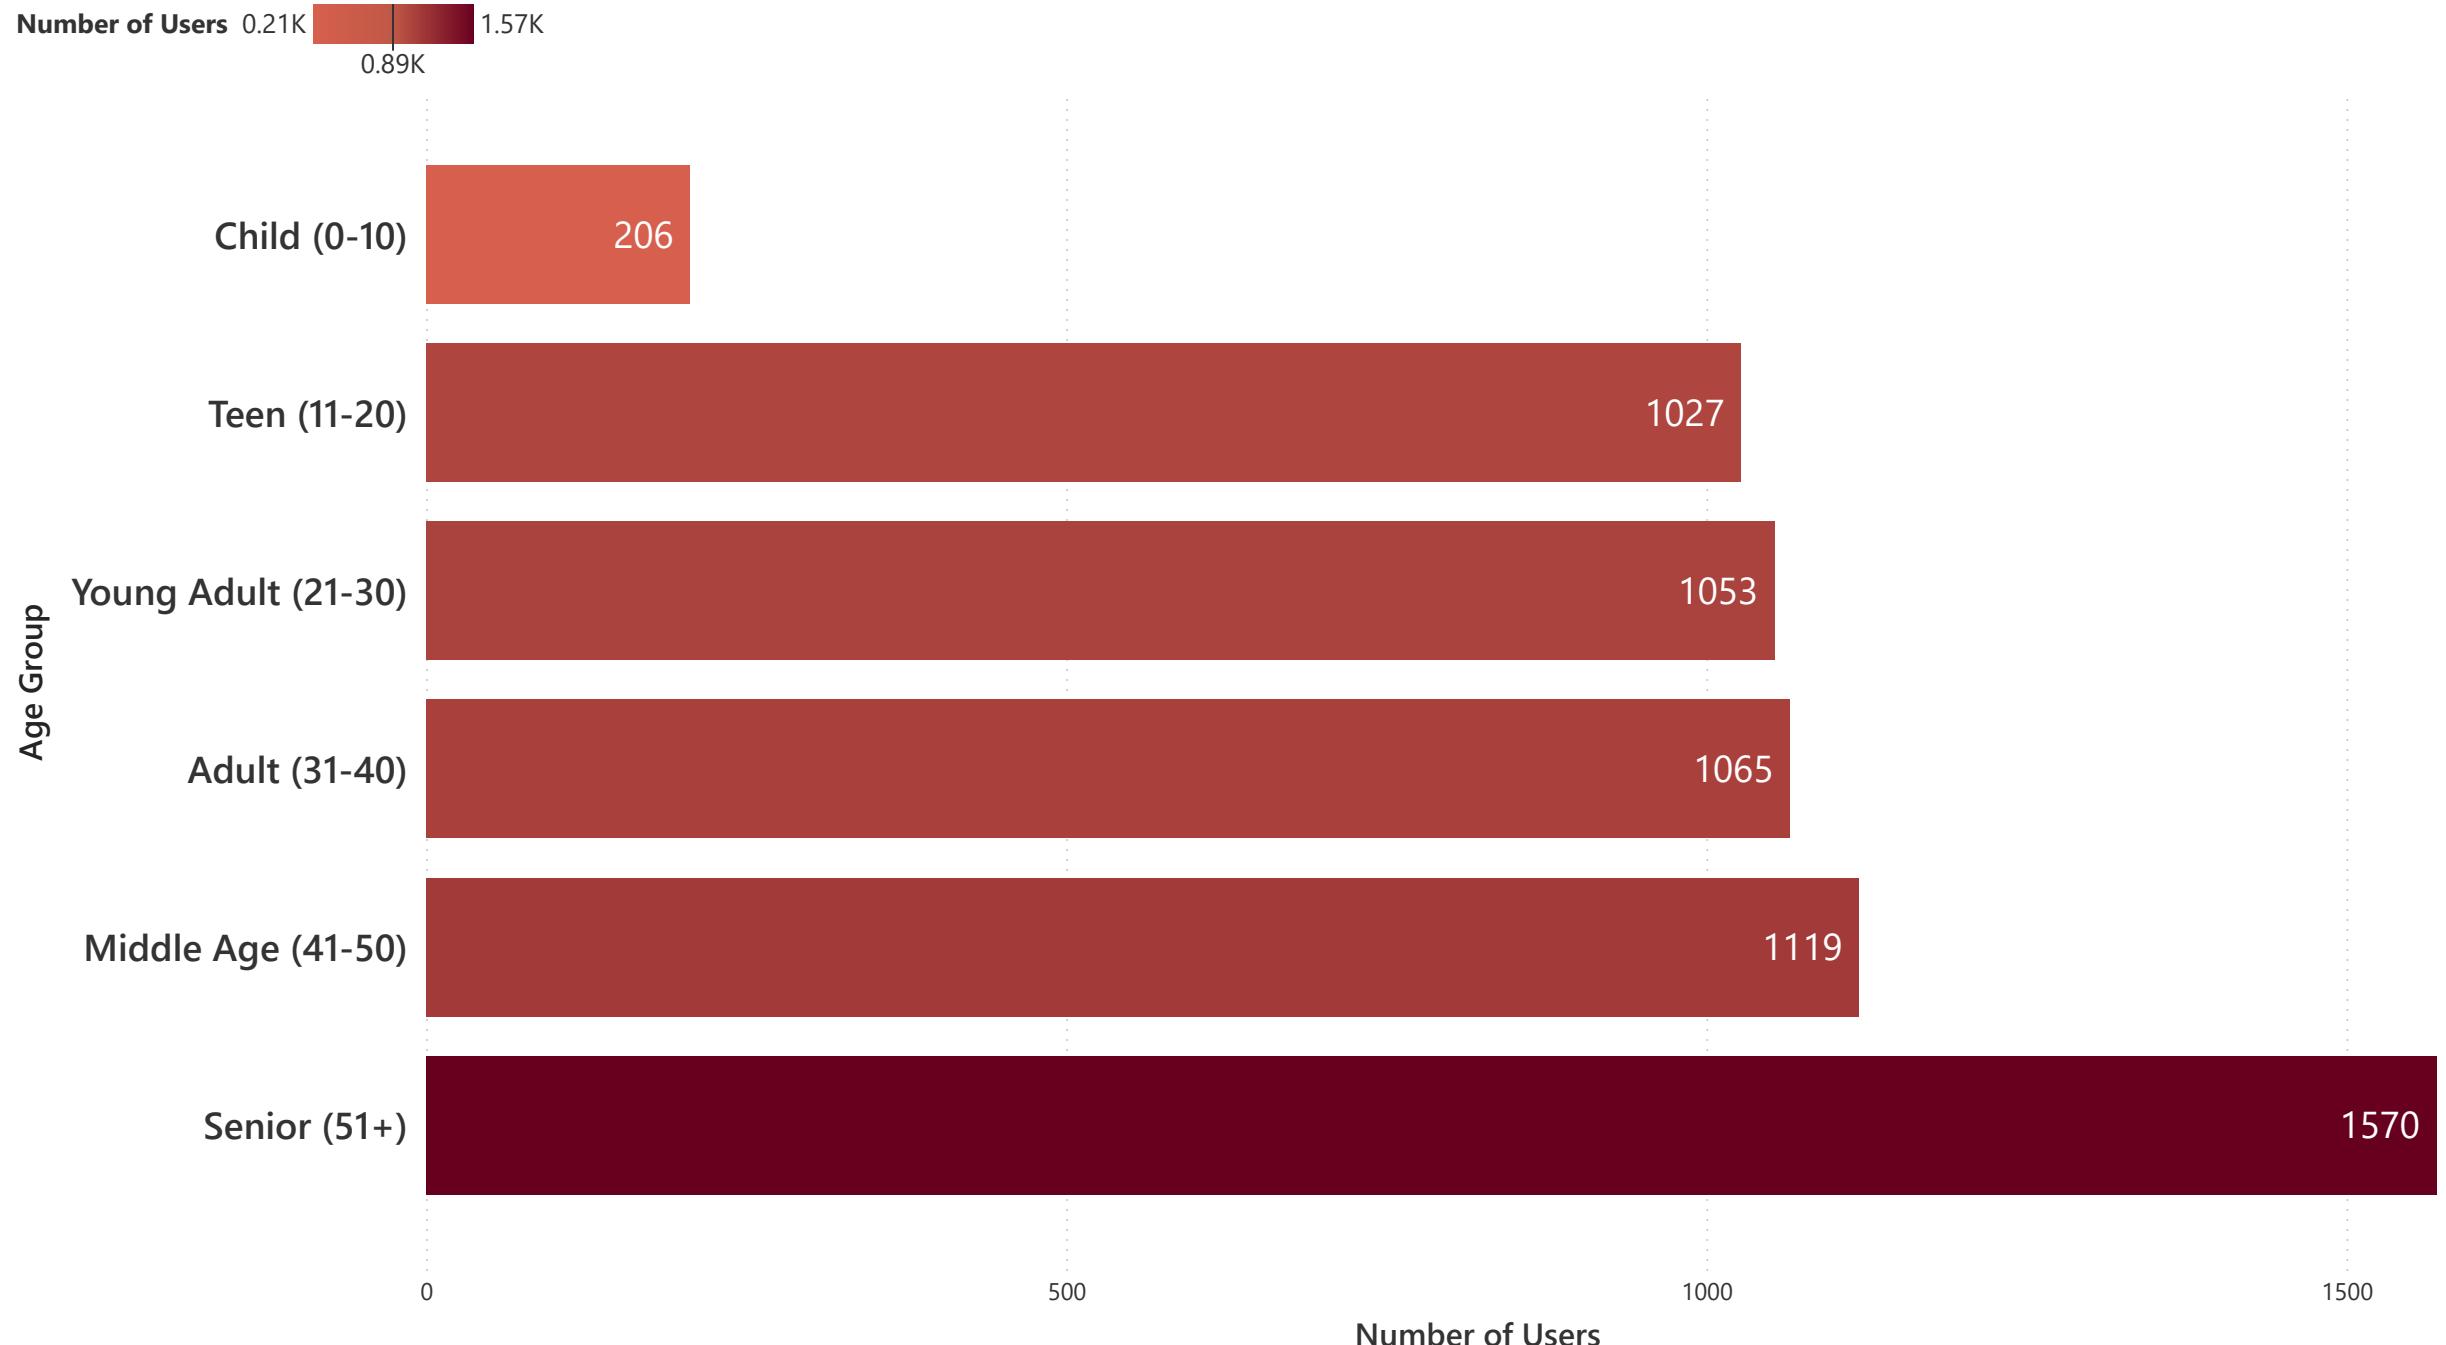

Prioritize UI/UX enhancements for older demographics (e.g., accessibility features). Tailor marketing with age-targeted messaging, e.g., "Feel-good classics" or "Ageless stories."

Keep the Momentum Going

Feature top film titles in a "Top Picks" carousel or "Critically Acclaimed" section. Promote these top-rated movies in email campaigns and banners.
